

National Handloom Day

PM SHRI Govt. JHS Pakshep was alive with color and creativity for its National Handloom Day celebration, proving that this timeless craft is more than threads. The event featured an amazing Handloom Exhibition where students and faculty proudly displayed the intricate beauty and extraordinary artistry woven into handmade fabrics, offering a memorable salute to craftsmanship. The celebration included a powerful student skit that drove home the vital cultural and economic value of these traditions, leaving the audience with deeper appreciation and ensuring this craft continues to inspire the next generation. This memorable day successfully wove together learning and celebration, ensuring the legacy of the handloom tradition remains bright and inspiring for future.

Earthain - Sustainability & Waste

Government Secondary School Sirwani Embraces Earthain Sikkim. Students dove head-first into the "Sustainability and Waste" challenge, trading textbooks for the real deal at the Martam Waste Treatment Plant in Gangtok. This wasn't just a trip—it was a deep dive into the nitty-gritty of waste management, giving students first-hand insight into how we can safeguard our planet. By seeing the processes up close, these young minds are now equipped to be the next generation of #MissionLiFE champions, transforming theoretical knowledge into powerful sustainable action. This practical exposé is expected to inspire school-based projects focused on reducing plastic use and improving campus waste separation. The school plans to integrate these field observations into their science and environment curricula, ensuring the lessons learned will benefit the entire student body. It's proof that learning about the environment is the best way to protect it!

Learning by Doing Activity

Sichey Senior Secondary School is redefining education by putting purpose into practice. Their impactful Environment Education Program is actively molding students into proactive, responsible citizens who don't just learn about the environment—they act for it. This initiative goes beyond textbooks, building a generation that understands the vital connection between humanity and nature, driving real change for a sustainable tomorrow. This is Mission LiFE in action, turning classrooms into catalysts for change. This comprehensive approach ensure that environmental stewardship becomes an ingrained habit, not just a temporary lesson.

Plastic Freedom Challenge

This Independence Day, the students of Sikkim Eco Club School proved that true freedom means both a clean planet and a cherished heritage! Launching the impactful Plastic Freedom Challenge, these young heroes didn't just clean up litter; they sparked a beautiful transformation, converting old plastic and glass into stunning flower vases—turning trash into undeniable treasure. Beyond clearing the school grounds and Tapara area, they were mentored by their grandparents through hands-on cultural activities, bridging generations with timeless wisdom. This powerful initiative shows us that sustainability and tradition go hand-in-hand, delivering a vital lesson that protects our roots while preserving our future. Join us in celebrating these incredible students who are setting a brilliant pace for #MissionLiFE!
