

Scaling Sustainable Crafting and Livelihood Skills

We are thrilled to report the successful conclusion of our impactful EEP workshop series across Gyalshing, Namchi, and Soreng! This inspiring initiative successfully engaged 60 School Eco Clubs and empowered over 300 enthusiastic students and dedicated teachers. Participants immersed themselves in a hands-on DIY project: skillfully crafting beautiful Corn Husk Button Flowers and elegant Bamboo Hair Clips. This effort serves as a tangible, creative alternative to Single-Use Plastics, driving immediate action against pollution. Inspired by the innovative spirit of the Adampool JHS Eco Club, this initiative didn't just teach crafting; it successfully introduced a sustainable revenue model for the participating Eco Clubs. By enriching livelihood skills at a young age and inspiring Green Skill Innovation, we are actively paving the way for a robust circular economy and future-proofing our planet, one sustainable craft at a time!

Eco-Friendly Initiative

Students and staff at Govt. Sec. School, Damthang successfully completed a fantastic project making organic duna (leaf plates)! This initiative promotes eco-friendly products and teaches valuable life skills while actively discouraging the use of plastic. Beyond environmental benefits, the project also celebrates our traditional cultural values, showcasing how indigenous knowledge can lead to sustainable practices. Furthermore, the focus on practical skills like bamboo craft and product creation introduces students to potential commercial opportunities and entrepreneurship in the green economy. Join us in celebrating this wonderful step towards a greener future and fostering a spirit of sustainability, skill development, and respect for tradition in our community.

Blooms of Success

The Eco Club of PM SHRI NGSSS recently transformed a barren patch of school land into a breathtaking sea of bright yellow marigolds! This special green initiative, led by enthusiastic students and dedicated teachers, truly blossomed. It not only enriched the aesthetic beauty of the school campus but also enhanced local biodiversity, and by using marigolds, it subtly honored a flower with significant cultural importance. On October 18, 2025, the club organized a successful Marigold Flower Stall, raising 1200 to fund future environmental projects. This effort is a stunning example of teamwork and sustainability, proving that a little seed of effort can yield a grand harvest of beauty and environmental responsibility. Kudos to everyone who supported this blooming success!

Eco-Friendly Goodbyes

Government Secondary School Labdang recently bid a heartfelt farewell to their departing teacher in a memorable and sustainable style. Setting a new standard for eco-friendly celebrations, the school presented a unique, handmade crochet bouquet as a token of appreciation instead of traditional flowers. This thoughtful gift, which truly lasts, not only honored the teacher but also demonstrated the commitment of the students and staff at Labdang GSS to environmental responsibility. This creative choice highlights the value of handcrafted items over disposable resources, sending a powerful message about reducing waste. The personalized nature of the crochet bouquet ensured the token of gratitude was as unique and lasting as the teacher's positive impact on the school community.
